Motivated Economics undergraduate with a strong foundation in digital productivity, web development, and foundational programming. Currently expanding analytical capabilities through dedicated data analysis training. Experienced in providing volunteer digital support, building interactive Python projects, and deploying live business websites using modern AI tools. Adept at combining analytical economics coursework with creative problem-solving, digital media, and rapid technical skill acquisition.

Education

Bachelor of Arts in Economics

Government Degree College Kupwara (University of Kashmir) | Expected Graduation: August 2026

Projects & Web Development

- **Dental Clinic Websites:** Designed, built, and deployed functional websites for dental clinics using AI-assisted development tools (Claude and Antigravity). Successfully managed hosting and deployment: [drkaiser.in](#) and [sk-dental-clinic.vercel.app](#).
- **Python Development Projects:** Designed and programmed multiple interactive applications, including a calculator, number guessing game, quiz, and rock-paper-scissors game to apply core Python logic and problem-solving.
- **Economics Assignments:** Successfully researched, structured, and completed multiple academic assignments focusing on core economic principles and data analysis.

Experience & Volunteer Work

Digital Support Assistant

Community Support | Kupwara, J&K

- Assisted community members with creating, formatting, and managing spreadsheets and digital documents.
- Provided hands-on digital literacy support, helping users confidently navigate various software platforms and productivity tools.

Certifications & Continuous Learning

- **Data Analysis (In Progress):** Interactive Training – *DataCamp*
- **Learn Python 3:** Free Interactive Course – *Educative*
